

A Warm Welcome from the School Head

Students, parents and teachers, on this first day of our preschool, Little Brown International Academy welcomes you all into either our Preschool Program or our After School Program. This year is going to be a great landmark year as we strive to reach our vision to:

1. Educate global minds
2. Inspire a love of learning
3. Celebrate creativity and achievement

Throughout this year we will all work together to explore and instill a positive spirit within our Little Brown community. First of all, we will strive to educate the global mind. This means looking at the world from multiple perspectives, respecting local and global environments, and possessing an attitude of openness to diversity and other cultures. Students will learn more about global mindedness through our cultural activities, such as Japanese culture week and international week. Secondly, the love of learning is the best gift any educator can give a child. We will teach the fun and joy of learning, as we want each student to understand that learning is not something we only do at school, but something that encompasses an important life-long process. We understand that students who love to learn will be self-motivated, curious, positive, and cooperative with others. Finally, we will celebrate our students' creativity and achievements. Every step forward and every effort they make to learn is a milestone for that individual student's life, as well as for our school and for the human race. Throughout this year I hope to see many celebrations for efforts made towards excellence. As this school strives to achieve these goals, I invite parents to participate and contribute in any way you can. I am looking forward to working together with you as part of our team for a successful school year.

Thank you,

Monica Kim
